

Install Microsoft .NET Framework 3.5.1 on Windows 7, 10, 11

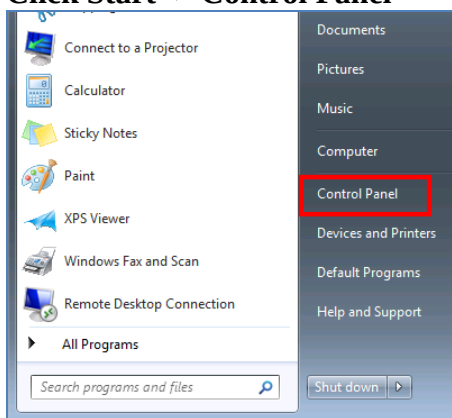

Note: These operations may take several minutes to complete, and might require a Restart.

Win 7 Procedure

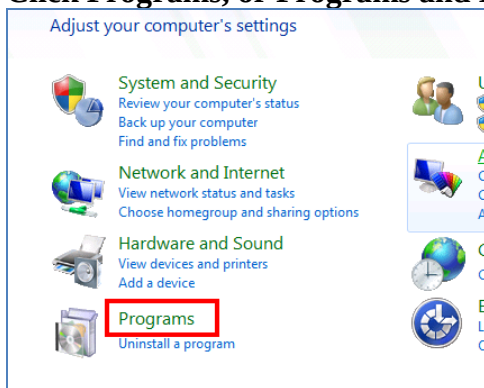

Microsoft .NET Framework version 3.5.1 is included with Windows 7. Enable as follows:

If you try to run .NET 3.5 installer downloaded from the Microsoft website on Window 7, you will receive the following error: You must use "Turn Windows features on or off" in the Control Panel to install or configure Microsoft .NET Framework 3.5 SP1. Instead of running the installer, follow instructions on this page.

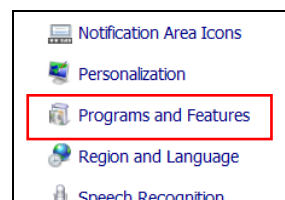

1. Click Start -> Control Panel

2. Click Programs, or Programs and Features

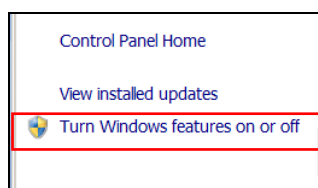

OR

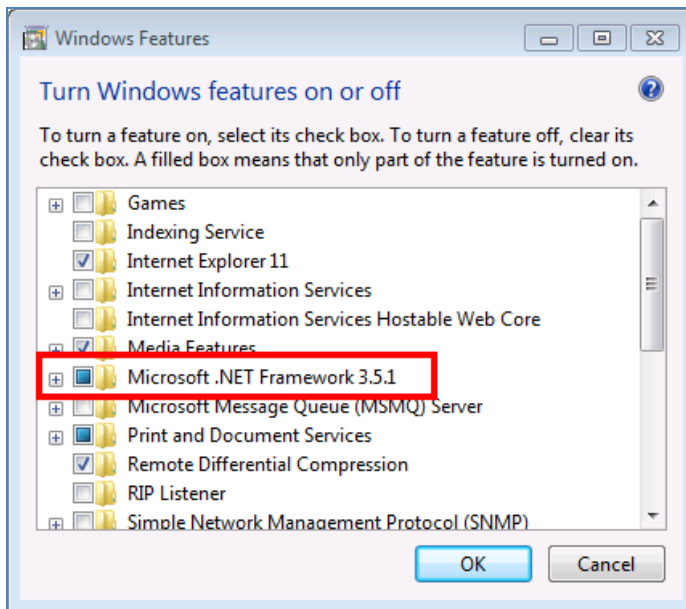

3. Click Turn Windows features on or off

OR

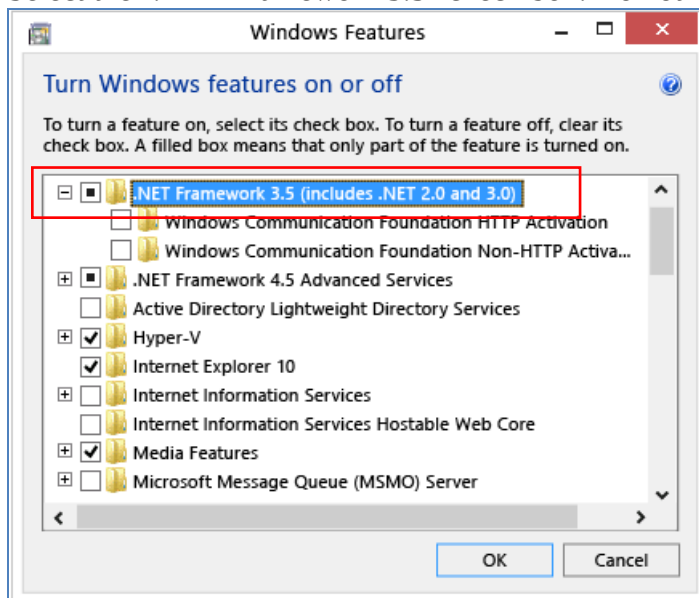

4. Click the checkbox next to Microsoft .NET Framework 3.5.1. You will see the checkbox become filled

5. Click OK
6. Wait for Windows to complete the operation. If it asks you to connect to Windows Update to download required files, click Yes.

Win 10 & 11 Procedure

1. Open the start menu.
2. Type in "Windows Features" and press Enter.
3. Select the ".NET Framework 3.5" check box. Do not need the 2 sub-category check boxes.

4. Click OK.
5. Follow any prompts during installation.
6. Restart computer if indicated.
